**Battelle for Kids** FORMATIVE INSTRUCTIONAL PRACTICES  
Align the rigor of the Florida Standards to high-quality instructional practices.

This blended professional learning experience is being used to prepare new teachers in more than 50 pre-service and alternative licensure programs, supports the development of the expanding number of new teachers, and helps prepare educators for the transition to learner-centered education.

"With what I learned, I used different techniques to call on students to increase participation and improve the feedback collected. Definitely more "aha!" moments, and a new interest in history!"—Brevard Educator

"What has resonated most with me is how powerful a learning target can be and how important it is for the success of every student in the class. It sets the bases for the teacher's planning and the student's learning."—Volusia Educator

"The modules have changed the way I think of teaching. This will benefit my students by allowing them to take more control of their learning and help them learn to think for themselves."—Hillsborough Educator
